Professional Summary

Computer Science student at UConn specializing in AI and cloud architecture. Experienced in developing agentic AI solutions and collaborating with teams to solve complex, real-world problems.

Education

University of Connecticut

Bachelor of Science – Computer Science

Concentration: Software Development & Design

Relevant Courses: Object Oriented Design, Algorithms, Systems Programming, Discrete Systems

Storrs, CT

December 2026

Work Experience

Charleen's Portrait Studio

Studio Manager

Dayville, CT

June 2025 – Present

- Directed daily studio operations, including staff scheduling and resource allocation to ensure seamless service delivery.
- Served as the main point of contact for key clients, managing project timelines.
- Developed and implemented automated workflows for repetitive administrative tasks, significantly increasing operational efficiency and staff productivity.

Creative Team Member

April 2022 – June 2025

- Handled customer service, including creating automated HTML emails for booking and sales.
- Used specialized software for photography and videography editing.

The Hartford Insurance Group

Tech & Ops Software Engineering Intern

Hartford, CT

May 2026 – July 2026

- Engineered an end-to-end conversational agentic AI to automate insurance claim filing, streamlining the user journey and reducing manual processing requirements.
- Collaborated with the AI Accelerators team to design and deploy scalable agentic workflows, integrating advanced reasoning capabilities into business processes.
- Architected cloud-native solutions using AWS and GCP to support agentic AI deployment.
- Evaluated and presented technical feasibility of the Gemini Live API for voice-driven AI.

Projects

Fire Hazard Vision AI System, Senior Capstone Project

- Team manager on a project sponsored by The Hartford for preventative fire risk detection.
- Gathered & annotated data, then trained multiple YOLOv8 vision AI systems to detect fire hazards.
- Created a website with live monitoring to alert users to hazards, powered by a Raspberry Pi 5.

Skills & Tools

Languages: Python, C#, HTML/CSS

AI/ML: Agentic AI, Google Agent Developer Kit (ADK), YOLOv8, Data Annotation

Cloud/DevOps: Google Cloud Platform (GCP), AWS Lambda, Amazon Connect, Git, GitHub, Docker

Awards & Recognition

Dean's List Student, UConn

U.S. President's Education Award, E.O. Smith High School

VEX Robotics Excellence Award, E.O. Smith High School
